To all California Certified Operators:

In an effort to assist every operator in maintaining his / her operator’s license during the COVID-19 interruption, OCT Water Quality Academy has posted a number of Online completion classes and is working to implement ongoing Zoom classes for Grade 1 – 4 WT, WD and WW operators. When given the “go ahead” we will re-open our classrooms in Sacramento.

The school has been advised that much remains to be considered by the California Water Resources Control Board staff with regard to the re-scheduling of Grade 1 – 4 Fall exams. Nevertheless, please note that the State is tentatively working to possibly re-schedule T – 5 examinations in late June. As yet, no additional announcement has been made with regard to possible testing dates.

If the T-5 interviews are indeed scheduled for late June, OCT is prepared to offer:

a. Three days of classroom WT Grade – 5 interview review preparation workshops in the school’s Sacramento classroom, or

b. Multiple hours of Zoom WT Grade – 5 interview review preparation workshops.

In the Fall of 2020, OCT anticipates that the State may possibly administer up to 10,000 exams in an effort to abate the COVID-19 interruptions and maintain certification goals. If this becomes the case, OCT is prepared to increase class offerings before each exam to ensure every operator can attend the class they need. The school will be doubling and tripling classroom opportunities for the following preparation review sessions starting this fall:

a. Water Distribution Grade 1 – 2 and 3 – 4 Certification Review Classes.

b. Water Treatment Grade 1 – 2 and 3 – 4 Certification Review Classes.

c. Wastewater Grade 1 – 2 and 3 – 4 Certification Review Classes.

Plus . . .

A number of WT, WD and WW Zoom based classes. The schedule is pending.

Online Classes:
